

# **I226 Computer Networks**

## **Chapter 11 Design of Network Equipments and Protocols**

### **(Review Questions)**

*Each chapter includes a few questions that are designed to help you to revise your first-level understanding of the slide material presented in the lecture.*

1. What model is used for network software like network protocols?
2. Explain the steps to build a protocol.
3. Discuss some issues which should be important to design a protocol.
4. Discuss the merit of using specification description language for protocol design.
5. What is network design? What are the required components for designing a network?
6. Explain two examples of network. What are their differences in terms of network design?
7. What software tools are available for network design?
